INTRODUCING ParkPass:

A Proven Parking Management System for Residential Visitor Parking

Turning parking problems into revenue opportunities

Parkinall ParkPass is an innovative new technology used to manage residential visitor parking.

ParkPass is FREE to authorized visitors for time-limited parking.

ParkPass collects PayByPhone payments for other visitor parking activities, including:

- Additional guests
- Overnight guests
- Extended stay guests
- Residents parking in the visitor parking
- Retail parking
- Limited Public parking

Authorized visitors can create a ParkPass using a smartphone. Text message alerts are sent to the visitor indicating when parking is about to expire.

Free and Paid parking activities are tracked automatically in a logbook that can be accessed by the patroller using a cell phone or mobile device. Detailed parking reports can be used to identify and document misuse of the visitor parking rules.

If this product idea is of interest to you...

I am available to meet with you to demo the product, and discuss how the **ParkPass** system can work to solve your visitor parking needs.
